stand-alone version
of our Forms server

The Seneca Forms Server is modular and consists of standard software. What you need is available on request. The Forms Server perfectly matches the form requirements of your organization and your target group.

Powerful online forms
- Design drag and drop forms
- Pre-fill information
- Custom calculations
- Input control to avoid errors
- Online payment function with iDeal etc.
- Signing function
- Fill-in and drop-off statistics
- Fully integrate every form in your website
- Standard links for authentication via ADFS, DigiD, eHerkenning and eIDAS

...and much more!
